## 1997 Femicide Report Women and Children Murdered in Minnesota

The Minnesota Coalition for Battered Women monitors information about women and children murdered in our state to educate the public about the lethality of woman abuse and child abuse. We pledge to remember the women, children, and family members and/or friends who die each year from domestic violence and the woman and children who die while being used in prostitution - a system of violence against women and children. Women used in prostitution are battered women in need of protection from abuse. We also remember the women and children who were murdered by acquaintances, strangers, or unknown perpetrators.

*We challenge communities to respond to battered women and their children by providing safe shelter and advocacy services, prevention education for all elementary and secondary students, laws to protect women and children, effective enforcement of those laws, and aggressive prosecution of all domestic assault crimes and all prostitution crimes targeting perpetrators, pimps, and "johns".*
